LPL LED - The Bright Light for Your Safety
Explosion protected floodlights in LED technique

Crouse-Hinds
by **EAT•N**

Ex-LED-floodlight LPL LED

(Zone 1, 2, 21, 22)

The powerful LED floodlight for harsh operating conditions

Due to the particularly robust and solid design of the enclosure in combination with the vibration resistance of the LED module, the LPL LED floodlight is insensitive to impact, shocks, and vibrations. As a result, the LPL LED represents the ideal lighting concept for use in areas with difficult environmental conditions. Thanks to the LED technology, extreme temperatures from -36 °C up to +50 °C are not a problem. The rugged, flameproof light metal enclosure in the degree of protection IP66 and impact-resistant glass meets the highest corrosion

protection and mechanical resistance requirements.

An efficient lighting technology

The new LPL LED lighting series offers the latest lighting technology with a high luminous flux and, at the same time, an extremely low energy requirement. The efficient LED modules provide a long service life combined with a high level of efficiency. With a power consumption of 53 W to 105 W, the LPL LED lighting series is ideal for replacing 70 W to 250 W conventional light fittings with up to 63 % energy safety, whereby, the low energy con-

sumption and the long service life (> 50,000 h) of the fixture keep operating costs pleasantly low.

Multiple applications

The LPL LED lighting series is suitable for medium and high suspension heights. It is the ideal solution for the illumination of open spaces, indoor areas and roads in industrial installations. Further applications include on- and offshore plants

in the oil and gas industry, chemical plants, waste disposal facilities, shipyards, power stations and mills where extreme amounts of dirt and moisture and increased mechanical hazard are to be expected. A U-shaped mounting bracket for wall and ceiling installation of the LPL LED is included.

Features

- High-power LED modules with up to 63% energy saving
- Flameproof enclosure for Zones 1, 2, 21 and 22 and temperature class T6
- Wide temperature range from -36 °C to +50 °C
- High degree of protection IP 66 for harsh environments
- Large Ex-e terminal compartment for ease of installation

Application: Chemical plant

LPL LED for nearly every application

The LPL LED is suitable for a wide range of hazardous areas, including applications in heavy industrial, chemical, petrochemical, oil and gas, pharmaceuticals, shipyards, dockyards, power generation, paper mills and wastewater treatment. The LPL LED comes with a standard U-shaped mounting bracket for ceiling and wall mounting. .

Challenge

Robust and low-maintenance equipment with a maximum of durability is needed, even in difficult to access areas with increased load of environmental influences as moisture, dust, chemicals or mechanical influences like vibrations.

Solution

The new LED-light fittings LPL LED fulfil this high requirement.

Results

By using the robust series of LED light fittings the repair and maintenance cost can be reduced significantly.

Application: Fire fighting boat

LPL LED ensures safe lighting on a fire fighting boat

The Mannheimer Fire Department's 'Metropolregion' fire-fighting boat is one of the most modern, well-equipped fire-fighting boats in Europe. On the boat, mixed teams made up of members of the Mannheim and ColdFusion fire brigades and the BASF plant's fire brigade, can be called into action. The boat covers a very wide area of the Rhine, from Germersheim to Worms, the Neckar all the way to the Neckargmuend lock.

Challenge

The electrical equipment and lighting on the boat must withstand the harshest of conditions, including the release of chemicals, flammables and explosive substances, or oil spills. With the constant risk of an explosive atmosphere, the safety of the crew and fire-fighting teams must be respected at all times.

All lighting must be protected to at least IP65, in order to withstand the constant exposure to moisture and splash water. In addition, the lighting needs to be robust and insensitive to shock and vibration that occur when the boat is operating. LED-driven lighting is particularly suitable for such harsh conditions, as they are shock-resistant and have no filament or glass bulb.

Product

For illumination of work areas on the fore and aft deck for the two foam-/water-cannon and the three loading cranes, Explosion-proof LPL LED spotlights are installed. These powerful spotlights are highly protected to IP66 and have a light output equivalent to that of a 250W high-pressure discharge lamp.
